ACADEMIC PROJECTS

- **EDUXA: E-Learning Web Platform**:
  I led the creation of an online learning platform called EDUXA. Our main goal was to make learning easier by simplifying the website and reducing distractions. We had over 40 users every day from college. (April '23)

  Key Points:
  - **My Role:** I was responsible for designing the website's appearance and managing its content.
  - **Users:** Approached college authorities and peers during the creation, receiving positive reviews from nearly 15 individuals.

  Contributions:
  - **Interface Design:** I designed the website to be user-friendly, keeping it simple and avoiding distractions for learners.
  - **Content Management:** I organized the content to help users focus on their chosen topics without being overwhelmed with the help of my Content writing skill.
  - **Algorithm Collaboration:** Collaborated with a team to devise algorithms for EDUXA, an e-learning platform, facilitating the recommendation of freely available study materials such as videos, texts, and research papers. The algorithms were designed to provide tailored suggestions based on user searches, leveraging the popularity ratio of the most viewed and liked videos on YouTube.
